

Project Leader Energy Management

Who we are.

At Bnewable, we are committed to supporting our Commercial and Industrial (C&I) customers in their energy transition journey. We invest, develop, and operate sustainable and decentralised energy sources (mainly mid-size Battery Energy Storage Systems, so called BESS) to help our clients achieve their goals. We place great emphasis on customer satisfaction, by simplifying and unburdening them of the complexity of energy, storage, production, asset management and flexibility valorisation.

As our **Project Leader Energy Management**, you will work within the product team with a focus on trading and optimisation of storage assets and be responsible for identifying valorization potential, defining the business model, and overseeing the complete realization of that business model—from concept to operational execution.

Are you ready to join a great team whose goal is to make an impact by making the energy transition happen?

Your responsibility.

As **Project Leader Energy Management** you will be responsible for:

- **Market Analysis:** Conduct in-depth analysis of the electricity market and the relevant products to identify opportunities to valorise the storage assets under our management.
- **Solution Development:** Design solutions together with the team to capture the identified value streams considering the regulatory framework. Build a plan with the Product Manager to realise the solution as part of our products.
- **Project Leadership:** Lead the full cycle of a project, from concept to operational execution, ensuring successful delivery within the trading and optimization team.
- **Internal and external collaboration:** Work closely with the internal development, regulatory & optimisation teams and relevant external stakeholders such as Elia, Fluvius and Ores to ensure seamless implementation of projects and trading strategies.
- **Operational Involvement:** Where necessary, contribute directly to the trading & optimisation processes to ensure the smooth integration and execution of projects.
- **International Expansion:** Start with projects in Belgium, then drive expansion into new markets by adapting frameworks and solutions to local regulations and opportunities.

As a true entrepreneur at heart, you'll be part of a dynamic and fun-loving team that values passion, play, and customer-centricity.

Your profile.

To be successful in this role, you'll need:

- a Master degree in the field of engineering or economics.
- 2-3 years of experience in the energy sector.
- a hands-on, pragmatic attitude with the ability to drive projects independently from ideation to execution.
- strong communication skills to coordinate effectively across multiple teams and stakeholders.
- to have a good dose of common sense and a focus on delivering results and meeting deadlines.
- be fluent in English, both oral and written.

But the best part? We're not just a company!

Bnewable is a rapidly growing renewable energy company and offers you a chance to grow with us by taking on a key role in making the energy transition happen.

We're a team of passionate energy experts who are eager to help and learn from our team members and to collectively grow as a team. We are committed to fostering a diverse and inclusive work environment, where everyone is encouraged to express themselves. We take care of our people by offering competitive compensation packages that reflect your worth and potential, combined with flexibility through our hybrid working policy, giving you the trust and freedom to manage your projects and responsibilities.

Employeneurship at Bnewable

Not just as a word but as a way of working, a paradigm even. Employeneurship is about thinking and acting like an entrepreneur, with the added security of employment. But more than anything, it is a guarantee for continuous development and the opportunity to really be fully responsible for the direction of your career.

(Y)our values.

B.

Authentic and result driven.
We bring passion to the game, it's contagious.

new.

Proud to challenge the market. The status quo won't transform the energy system.
We are humble and resilient.

able

Collaboratively with a no-nonsense attitude.
Bringing clarity and reliability to our customers.

So, what are you waiting for?

If you like what you read and you have **#goesting** to join the Bnewable team and contribute to our story, please reach out by sending your CV and let's make a difference together.

Can't tick off all the talents but still feel the itch? Then be sure to apply! A match is a match, and sometimes more important than a list.

Cheers,
The Bnewable team or #Bnewies!
